PRESS RELEASE

Good News!
Time Machine is Available for Windows Server 2022

“Windows is one of the major platforms that Time Machine supports, so naturally Time Machine would be extended to support newer OS versions as they come out.” Says CTO of Solution-Soft

Windows server version 2022 is the latest major release of the Windows Server operating system by Microsoft, as part of the Windows NT family of operating systems. It succeeds Windows Server 2019.

PRESS RELEASE

Time Machine Container for Kubernetes and Red Hat OpenShift Available Now Both in the Cloud and On Premise

SolutionSoft Systems Inc.,, the Leader in Virtual Clock and Time Shift Testing announced today that Time Machine for Containers (TMCON) is now available. A name space level virtual clock and non-root sidecar approach makes enterprise level Kubernetes time travel and deployment a breeze.

Time Machine saves ten-fold or more on resources and costs associated with temporal testing of applications. It enables you to finish your large scale software projects on time and under budget. With the new release, Time Machine for Containers revolutionizes time travel application testing in containerized environments.

A WORD FROM OUR CUSTOMERS

FROM THE GOVERNMENT SECTOR

"Time Machine a powerful enabler for testing time dependent logic in a controlled and more importantly safe manner. We sense a genuine desire from our account manager through to the support team to make our needs a priority. In the end it feels like they are an extension to our team."

*DWP Development Architecture
Accenture*

FROM THE BANKING & FINANCE SECTOR

“Time Machine has been a great complement to our collections projects, as it helps our customers to reduce time to ROI and allows us to have great confidence in our testing cycles.”

*Senior Director of Business Development
FICO*

FROM THE INSURANCE & HEALTHCARE SECTOR

“At Medavie Blue Cross, we have to conduct date forward testing for our internal provincial claims systems on a regular basis. With Time Machine, we’re able to host multiple Oracle testing environments on the same system for multiple developers and testers. This not only saves significant costs for potential hardware and software, but also streamlines our application testing process.”*
