NEW RELEASE

SOLUTION-SOFT ANNOUNCES THE RELEASE OF SSL CERTIFICATE EXCLUSION ENHANCEMENT TO MEET ENTERPRISE CUSTOMERS' DEMAND

Solution-Soft Announces the Release of the High Demand Time Machine® SSL Certificate Exclusion Enhancement to Meet Enterprise Customers' Need

Press Release: Thursday, June 3, 2021

SolutionSoft Systems Inc. (Solution-Soft), the Leader in Virtual Clock Testing and Time Shift Testing has announced the general release of Time Machine Windows enhancement of SSL certificate exclusion.

SSL certificates have a valid date range build-in and the authentication would fail if the systems checking the certificate are outside of the valid date range. This represents special challenges for customers performing time shift testing with virtual clocks. The application would fail if virtual clock is either before or beyond the SSL certificate valid date range.
