

Time Machine® Saves Time and Resources During Telstra's SAP® Rollout

Quote

“Using Time Machine, Telstra was able to test all the scenarios of their SAP R/3 upgraded release in the allotted project time while saving money on system administrator resources.”

Pooven Govender,
Consultant/SAP Basis Team,
Deloitte Consulting, Telstra

About Deloitte Consulting Outsourcing

Deloitte Consulting Outsourcing is one of the world's leading consulting firms, helping clients to translate leading ideas and technologies into sustainable, competitive, and strategic advantage. Deloitte Consulting professionals are uniquely known as the industry's only authentic consultants. They work collaboratively with clients to marry strategy to technology, driving complex change initiatives that deliver real value.

Challenges: SAP Testing Requirements

As part of his SAP testing procedure, Pooven Govender of Deloitte Consulting Outsourcing, simulated date changes to test Payroll and other related HR functionality in the client's upgraded release of SAP R/3. As part of their SAP certification process, the system needed to be tested on multiple dates in the future.

This meant resetting the system's hardware clock to simulate a future date. While seemingly simple, resetting a systems clock entailed a long and complex procedure including:

- Shutting down all applications running on this system (SAP R3, Oracle, etc.)
- Resetting the system's clock
- Rebooting the system
- Restarting each application
- Verifying each application worked properly.

Although the above process was easily achievable, it meant that the environment needed to be restored to its original state each time as each test/simulation started from the same date. This process required experienced Unix Administrators and SAP Basis resource, and at least 2 days to achieve. To further complicate matters, there were many date simulations, which would have resulted in many system outages. Because of these difficulties, they were looking for an effective method to optimize this process.

Time Machine Solution

Time Machine allowed them to dynamically change both the time and date seen by their SAP application without having to shut down, reboot, and restart the system and various applications each time. Additionally,

About Solution-Soft

Solution-Soft is the leading provider of Intelligent Data Optimization (IDO) solutions, which address the urgent need for management of business-critical applications and data.

The flag-ship Time Machine product is a proven solution for enterprises to ensure mission critical applications are delivered on time and within budget. Solution-Soft works closely with consultant and strategic partners around the world in all industries to achieve clients' business objectives with ultimate ROI.

Founded in 1993, Solution-Soft is privately held and based in Silicon Valley, CA, USA.

no system administrators (Database, Application, etc.) were needed during these changes since no re-boots or system recoveries were needed and the only user(s) affected were those defined within Time Machine. Using Time Machine, they were able to test all the scenarios in the allotted project time, and save money on system administrator resources.
